IMPORTANT NAVAL VICTORY. The naval engagement off the Falkland islands whereby three German warships were sunk is of much imprevious combat off the coast of Chill. It is particularly reassuring to any who had doubts as to the ability of the British navy, and in view of the

was a victory which was needed. Previous to this time the German naval loss in the number of vessels was greater, but when figured on the basis of tonnage the British loss was considerably the larger. Though but 20 British vessels had been destroyed

Karlsruhe and the Von der Tann, the whereabouts of which are uncertain, the combined strength would furnish no formidable squadron for the British vessels in that locality. The outcome is a decided British victory and which in accordance with the naval strength of that nation was to be expected. South America will look upon it as a relief from commercial terrors.

GET AT THE TRUTH.

With the people holding the belief that the facts should be known relative to the state of preparedness of the national defenses, and the administranational defenses, and the administration declaring everything to be in proper condition, it doesn't satisfy to have the claim made that it is a partisen effort and that it is useless to pay attention to the "nervous and excited."

DENMARK'S FINE EXAMPLE.

While the compulsory school attendnce laws are being enacted or stiffened in states of the country it is inresting to note how important such are for the elimination of illiteracy. In Denmark for instance compulsory attendance upon school between the ages of seven and fourteen is so strictly enforced that the few who persist in avoiding their legal responsibilities are punished so severely that they are glad enough to change their minds Neither illiteracy nor non-attendance at school is encouraged in that country and as a result only one person in 1,000 is unable to read and write, as compared with seven out of every tained since the opening of the war it 1,000 in the United States. Of 260,000 Danish children of school age only 370 failed to attend school during the year 1911. Can this be said of the average state in this country?

The record in that country is ever more remarkable when it is realized or interned to Germany's 36, the approximate British tonnage was 155,000 to 118,000 for the Germans and the British loss of lives was over twice as large. The latest engagement therefore helps materially to even up the score.

More important, however, is the setback which will be given to the operations of the German fleet in the Pacific and southern Atlantic, where the preying upon commerce has been of great annoyance to the neutral countries of that continent. Even though by any chance the remnant of that broken fleet should be joined by the Karlsruhe and the Von der Tann, the that school is held six days a week

FAMOUS TRIALS

TRIALS OF ORSINI, ET AL.

On Jan. 14, 1858, an attempt was made in Paris upon the life of the Emperor, Napoleon IIL, by Felix Or-sini, an Italian and other conspirators, leading among whom were Pierri, Ru-dio and Gomez. Three shells were exdio and Gomez. Three shells were ex-ploded, two persons were killed and many wounded.

December has to administer quite a violent lesson in sending April back to its proper place.

While the stock exchanges have been closed quite a number seem to have gotten along without temptations.

They had betrayed him he gave way to a feeling of vengeance.

Alisop, the Englishman, who had aided him in procuring the manufacture of the bombs and under whose name and with whose passport he had entered France, did not know that the bombs were intended to be used to kill the Emperor, but supposed that they were to be used in Italy.

At the trial Orsini was defended by M. Jules Favre, who, in his speech read a letter from the prisoner to the Emperor: "The depositions which I have made against myself," says Orsini, "are sufficient to send me to the scaffold, and I shall submit to my fate without asking pardon, both because I will not humiliate myself before him who have destroyed the receiving him who has destroyed the reviving The supreme effort for a decisive am now placed, death for me will be a

The trial consumed only the better part of a day and all of the prisoners were found guilty. Gomez, with extenuating circumstances considered, was sentenced to hard labor for life. The others were condemned to death. The sentence of Rudio was subsequently computed. Oranic and Pierri quently commuted. Orsini and Pierri were executed by the guillotine on the 18th of March, the former meeting his fate with much dignity and firmness, while the latter betrayed tokens of

At the time of the attempt to assassinate the Emperor, Napoleon III., and the Empress were on their way to the theatey. The intended victims I were unhurt, but Orsini himself was wounded and was at once arrested. Besides the letter the assassin addressed to the Emperor requesting that he take up the cause of Italian liberty, he wrote another one to the youth of Italy, stigmatizing political assassination.

The importance of Orsin's attempt trouble. The action taken tends to discourage such strikes and the adjustment of such questions as may be involved in the employment of labor through the same method of arbitration. It is good news which comes from Colorado.

The man on the corner says: One on the life of Napoleon III. lies in the fact that it terrified him, and he came to believe that unless he took up the Italian cause other attempts would follow and that sooner or later he would be assausinated. HER EXTRAVAGANT OFFERING

"What a perfectly beautiful rug this is!" I couldn't help exclaiming as Maiste proudly took me into the fiving room, where there was a rug even handsomer than that in the hall.

"'Yes,' she said, it's one of our greatest treasures. We didn't receive any presents we prize more.

"It's colors are extremely pleasing, and I like the design very much,' added Mr. Gilmore, 'and, as Maiste told you, we consider it one of our choicest possessions."

"Well," I remarked, I should think you would. I'm glad you haven't the little pottery vases in this room, They would be quite outsbone by this magnificence.

"I hope,' he said, with a surprising gravity, 'that you don't think we show lack of gratitude or appreciation. Surely you received Maisie's letter thanking you.

"'Oh, for the vases? Yes, indeed. I'm awfully glad you liked them. But I was speaking of these marvelous rugs, for I really think it would be too bad for you not to fully realize what a little fortune is locked up in them. I don't suppose you've had much experience yet in buying rugs, but I have.'

"I make a selection? I don't un-derstand,' I murmured. "Why, didn't you select them your-self, Mrs. Thorndike?" asked Maisie, "I'l select these rugs! Certainly not.

"I'll select these rugs! Certainly not. I never laid eyes upon them until now. I never even heard of them."

"'Surely you must have—why—they came with your card.' Maisie looked fairly dazed, but suddenly a great light burst in upon me.

"'My child,' I cried, I know now! That was Een's doing! The rascal—not to tell me a thing about it. But, mercy on us, what did you two think of me?"

There is no family which does not need at this season of the year, many articles of dress or of household plen-ishing, which may appropriately be given as Christmas tokens. There are many little accessories, desirable and proper, which are not essential enough proper, which are not essential enough to be purchased by persons for themselves, yet which they would be very glad to have and to use. A little thoughtful observation will enable one to give things that will be very acceptable that are just un ecessary enough to have the real holiday touch. A gift that "you have to have, anyway, and that you'd get if it wasn't Christmas just the same," lacks that touch, oftentimes, and gives less real pleasure than something which costs pleasure than something which costs less, yet is unobtainable except as a gift.
